

Ideation Phase

Define the Problem Statements

Date	04 October 2026
Team ID	SWTID-2026-5741
Team Members	N. Logeswari, S. Christiena
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Problem Statement

Import Data using Transform Maps (Spreadsheet) | Team ID: SWTID-2026-5741

I am	I'm trying to	But	Because	Which makes me feel
PS-1 Responsible for employee records on a ServiceNow instance	PS-1 Bring a large employee list from Excel into ServiceNow	PS-1 Manual typing is slow and causes mistakes and repeated records	PS-1 Spreadsheet columns are not linked to the target table fields	PS-1 Stressed and unsure the data is accurate
PS-2 Maintaining master employee data for the organization	PS-2 Keep ServiceNow current each time a new sheet is received	PS-2 Importing the same person again can create a second record	PS-2 No unique key such as Employee ID is used to find existing rows	PS-2 Uneasy about trusting the loaded data
PS-3 Learning the ServiceNow platform as a student developer	PS-3 Find a reusable method to load bulk data into a table	PS-3 Not clear how Import Sets, Transform Maps and Coalesce work together	PS-3 The steps are spread over several modules with no single view	PS-3 Hesitant to run a transform on real data

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Responsible for employee records on a ServiceNow instance	Bring a large employee list from Excel into ServiceNow	Manual typing is slow and causes mistakes and repeated records	Spreadsheet columns are not linked to the target table fields	Stressed and unsure the data is accurate
PS-2	Maintaining master employee data	Keep ServiceNow current each	Importing the same person again can	No unique key such as Employee ID is	Uneasy about trusting the loaded data

	for the organization	time a new sheet is received	create a second record	used to find existing rows	
PS-3	Learning the ServiceNow platform as a student developer	Find a reusable method to load bulk data into a table	Not clear how Import Sets, Transform Maps and Coalesce work together	The steps are spread over several modules with no single view	Hesitant to run a transform on real data
