

Project Design Phase Solution Architecture

Date	02 OCTOBER 2026
Team ID	SWTID-2026-5741
Project Name	IMPORT DATA USING TRANSFORM MAPS(Spreadsheet)
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture bridges the gap between the business problem and the technology solution. Its goals are to find the best technical solution for the problem, describe the structure and behaviour of the solution to stakeholders, define features and phases, and provide specifications for delivery.

Example - Solution Architecture Diagram:

Step-by-step explanation

Step	Action	ServiceNow location	Output
1	Prepare source file	Excel / CSV on the local computer	Clean file, one record per row
2	Create data source and load data	System Import Sets ▶ Load Data	Import Set record
3	Stage rows	Import set table (u_imp_*)	Raw rows ready to transform
4	Create transform map	System Import Sets ▶ Transform Maps	Source → target map
5	Map fields and set coalesce	Field Maps related list	Field maps + unique key
6	Run transform	Import Set ▶ Transform	Records inserted / updated
7	Verify results	Target table list, Import Log, Transform History	Verified data and log
