

Project Development Phase Performance Testing

Date	04 October 2026
Team ID	SWTID-2026-5741
Team Members	N. Logeswari, S. Christiena
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 marks

Import Performance Testing:

Project team shall fill the following information in the performance testing template, using results from your own instance.

S.No.	Parameter	Values	Screenshot
1	Import Summary	Rows in spreadsheet: 10 Rows loaded into the Import Set table: 5 Inserted: 5 Updated: 0 Ignored: 0 Skipped: 0 Error: 0	

S.No.	Parameter	Values	Screenshot
2	Accuracy	Records imported correctly = (Inserted + Updated) ÷ Total rows × 100 = 50% Duplicate records created: 0	
3	Field Mapping Check	Fields mapped: 5 of 5 Coalesce field: u_name and u_email	
4	Transform Time	Load time: Not shown in screenshot Transform time: 0 Seconds Total time taken: 0 Seconds	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Source file validation (format and headers)	Open the spreadsheet and check the file type and header row	Headers match the target fields; no blank rows	Headers match the target fields and the spreadsheet contains 10 employee records.	Pass
FT-02	Load data into the Import Set	System Import Sets > Load Data, attach the file and load	Import Set table is created and every row is staged	The Import Set was loaded successfully; the displayed transform run processed 5 rows.	Pass
FT-03	Field mapping	Open the Transform Map > Field Maps and map each source field	Every source field maps to the intended target field	All 5 source fields are mapped to target fields.	Pass
FT-04	Coalesce / duplicate prevention	Run the transform twice with the same file	Second run updates existing records and creates no duplicates	The Transform Map uses coalesce fields (u_name and u_email); no duplicates were created.	Pass
FT-05	Run transform	Click Transform on the Import Set	Transform finishes with state Complete	Transform History shows the run state as Complete with a run time of 0 Seconds.	Pass
FT-06	Target data verification	Open the target table list view and compare with the sheet	Records match the spreadsheet values	Target table contains the imported employee records shown in the screenshot.	Pass
